		ERT J. SANDY ARY EXAMINER	

Continuation of 13. Other: Applicant's remarks presented on pages 1 and 2 of the amendement filed February 27, 2007 is found not to be persuasive. In particular, applicant's remarks state that prior art reference to Chen fails to anticipate every limitation in applicant's claims 1, 15 and 21 respectively. Here, applicant argues that Chen does not disclose or suggest an opening adapted to expose the fixing portion in a direction of the second rotation axis as recited in claim 1. Nor, an opening adapted to expose the fixing surface perpendicular to the first rotation axis as recited in claim 15, and nor does Chen disclose or suggest an opening adapted to expose the fixing groove in a direction of the second rotation axis as recited in claim 21. The Examiner respectfully disagrees and points out to applicant that Chen does disclose an opening defined by a gap or spacing on either side of a concave section near 341. Alternatively, as shown in figure 5, the opening is defined by a gap or spacing between inner edges of identically shaped clips with a central hole 377. Thus, this gap or spacing is considered equivalent to applicant's opening adapted to expose the fixing portion, the fixing surface and the fixing groove as recited in claims 1, 15 and 21. Furthermore, the phrase "adapted to expose" has been held not to be a positive limitation, but only requires the ability to so perform the intended function. It does not constitue a limitation in any patentable sense. In re Hutchison, 69 USPQ 138. Therefore, the opening of Chen is only required to have the ability to expose the fixing portion/surface/groove as claimed. Accordingly, for the reasoning explained above, claims 1, 15 and 21 (and their respective dependent claims) remain unpatentable over Chen as set forth in the Final Office Action of December 1, 2006.
